### PROJECTS

#### Electricity Billing System Project

This project aims to develop a computerized electricity billing system that simplifies the process for both electricity providers and consumers.

- Developed using Java and Object-Oriented Programming (OOP) principles.
- Designed a user-friendly interface for efficient bill management.
- Implemented a MySQL database for secure customer data storage.

#### Movies Website

Explore movies with ease! This website lets you search for films, see cast, ratings, release dates, and short descriptions.

- Contributed as a front-end developer, utilizing HTML, CSS, JavaScript, Bootstrap, and jQuery to create a visually appealing and interactive movie website.

#### Online E-Commerce Website

This project envisions a user-friendly online e-commerce website designed to transform your shopping experience.

- Developed using Object-Oriented Programming (OOP) .
- Implemented core functionalities like login, authentication, and product addition using pure PHP and MySQL.
- Integrated a SMTP server for sending customer emails.

#### Green Songs Project (Full-Stack Developer)

This website lets you follow the artists you love and create your own favorite songs list.

- Designed and implemented both the client-side and server-side of a personal music website called "Green Songs."
- Developed Using HTML, CSS, JavaScript, jQuery, PHP, MySQL, and Bootstrap.
- Established clear separation between client and admin functionalities using Object-Oriented Programming (OOP).
- Project : <https://greenssongs.000webhostapp.com/>

#### Wasalny Web App

This Project For guiding Metro Passengers through the metro routes, helping Them reach Their destination effortlessly.

- Developed Using React JS, CSS, and Bootstrap to create a user-friendly and responsive interface.
- Project : <https://wasalny.vercel.app/>

#### Central Perk Gallery

This Project For Sharing Images Between Users Allowing Them To Download what Inspires Them.

- Developed Using HTML, CSS, JavaScript, jQuery, PHP, MySQL, and Bootstrap.
- Project : <http://centralperkgallery.000webhostapp.com/>

---

## Weather Web App

This React.js weather app keeps you informed with current, overnight, and next 4-hour temps, plus feels-like, rain chance, and humidity.

- Developed Using React Js With Hooks {useState , useEffect} , Axios , WeatherApi.
- Project : <https://kerolos-weather-app.vercel.app/>

**- Collaborated closely with cross-functional teams to foster a culture of effective teamwork, ensuring seamless coordination and optimal workflow management.**

---

## CERTIFICATES

- Completed WEB Development Challenger Track - Egypt FWD
  - Completed Building Web Applications (PHP & MYSQL) - ITI Platform
-
